

Sheet1

Number	Risk	Probability value	Consequences value	Risk value
1	Unavailability of large labeled logo database	4	4	2
2	Training time of the classifier including, labeling the dataset and corresponding output value	3	4	3
3	Unavailability of automated logo detector for comparison and calculation of accuracy	2	2	1

Number	Action plan for mitigating risk	Risk mitigated (number)
1	Creation of large database of labeled logo	Risk 1
2	Training time reduction using multiple GPUs	Risk 2
3	Manual database creation for number of logos in the validation test video sequences	Risk 3
