1 Daily journal summary

1.1 07/01/2015

Accomplished tasks

- Two GPUs are connected and ensured working of example cuda code.
- Used opencv 2.4.10 to run the code with gpu support.
- Must ask for SLI interfaces to connect one more GPU.
- Basically in three working days, entire infrastructure required for starting the implementation has been setup and ensured working.

1.2 08/01/2015

Accomplished tasks

- Read through papers related to brand logo detection.
- Identified few of the feasible methods to do brand logo detection.
- Started reading about Bag of Words, Inverted file and DB concepts.
- Started thinking in the lines of implementation of delaunay triangle based method in opencv.
- Till weekend plan is to work on Proof of concept involving brand logo detection using delaunay triangle.
